General Comment

I oppose implementing the proposed Chesapeake Bay TMDL limits because...

- NY already has the cleanest water in the watershed and effective pollution control programs.
- The proposed additional limitations will be an unfair burden on NY agriculture, municipal services, taxpayers, businesses, and residents.
- The EPA model is flawed, not proven, and not suitable for being the basis for the proposed limitations.
- Most specifically, the EPA should incorporate the model revisions recommended by the DEC in their Watershed Implementation Plan.
